Popular websites and apps include iHeartRadio, Spotify and Pandora. The best sign that this is working is shared laughter and a busy chat window.5. Show you careYour job is to skillfully entertain, inform, and involve an audience you may never meet in person and convince them that you care. Once you're on the radio station's homepage, look for any links or buttons that say "Listen." "Play." "Listen Live" or "Listen to Live Broadcast." Click on the desired link or button to tune in to the online radio broadcast. You can find websites to do this or download apps on your mobile device for quicker access. Here are six techniques taken from the world of radio that are guaranteed to improve the ratings of your online meetings:1. Note: Current Version of CPS is 23.00.03 Please use your current Login and Password to access either site. Think about your audience and talk to them in a way that takes into account their place (culture), personality, and preferences. Remember the 1-2-3 rule for talking about tricky situations; namely, for every fact you mention, you should talk twice as much about the solution and three times as much about the relationship.Remember, there is a huge gap between your colleagues putting you on mute and the total audience immersion of FDR, about whom Halberstam wrote, "If he was going to speak, the idea of doing something else was unthinkable." Somewhere in that vast ether you can find your radio voice. If you don't know the website of the radio station, try using a Google search to find it. They were "reaching out" years before the term became fashionable.Radio networks were not slow to realize the power of the radio, and they harnessed that power in the words, in the cadence, and in the music of speech.That is just precisely the way we should run our online meetings. Alistair Cooke had the knack for this. The Technisonic Data Programmer (Multi-TDP) software now available for download from this page will allow anyone with a standard personal computer (PC) to retrieve data from a connected transceiver for editing, sorting and sharing with other Technisonic transceivers. This VHF handheld is interoperable with the Falcon® family of radios, and keeps mission communications secure despite high-noise environments with its Quicklook ECCM waveform suite and Free Channel Search technologies. Following is the specific guidance to finding your CPS Software resources going forward. You can listen to a radio broadcast on your desktop PC, laptop, tablet or smartphone as long as the devices have an internet browser, speakers or headphone jacks. There are several ways to listen to the radio online, and this guide shows you two of the easiest ways to do it. Create shared rituals, such as starting and finishing with a round of "greet and go." Introduce weekly features to help build culture and common values. Speak with a smile in your voice; people will feel it.4. Act as if you belongA club's collective memory, past experience, and shared rituals is what keeps its members coming back. Just look for the audio-on-demand feature to listen to any of the radio station's archived broadcasts. The TDFM-136A/B and newer generation TDFM-136 with firmware version 2.X.X main code (displayed on power up) uses V2.6.0 or above programming software. Read More. Download and install the latest release of the VCP driver for Windows per the instructions on the web page located here. Download an AppAn alternative way to listen to an online radio broadcast is to use a source that gives you access to a host of radio stations. Follow her on Twitter at @susan1stclass This way of listening to the radio online is for those who aren't too specific about the radio broadcasts they want to hear as well as those who simply want more program choices. Continue to listen to your choice of online radio stations. Software / Cables Ordering GuideQuick Reference Guide for models TDFM Series Radios Default Code Plugs and CPS Resources Read More. Choose Your Station or ProgramAnother advantage of listening to the radio online is you can listen to your favorite programs at your convenience. If your Technisonic product uses a USB interface, it is configured as a Virtual Com Port (VCP) which emulates a serial COM. Know your audience and prepare beforehandPrepare to talk about things that interest your audience and address them as individuals. Sign InAfter signing up for your free account, you can choose from the selection of radio stations and start listening. MORE FROM QUESTIONSANSWERED.NET Ideal for long-range communications and in close combat, the RF-7800V-HH provides continuous coverage in the 30 to 108 MHz band with up to 10 watts of output power. Susan Fisher is Principal at First Class, a communication, leadership, talent development consultancy, and training organization. Garrison Keillor, presenter of the long running, much syndicated Prairie Home Companion, said "I feel obligated to do something for [my audience], just as you would be obligated to clean your house and make food if you had friends coming over."Compensate for not being able to see their body language, habits, and mood by listening hard. The best radio announcers knew their audiences like friends and spoke to their audiences with charm, brought them close, and gave them a feeling of belonging. It's a mistake to think that everybody's clinging to your every word." Single out people on the call by name to keep them engaged.Since you can't see important gestures and body language on calls, all you have to go on is voice. Also, like a good call-in radio program, ask questions and make the call interactive.2. Address individuals on the callTake the advice of the U.K.'s most popular mainstream radio broadcaster, Terry Wogan: "We're not talking to an audience. Radio was essentially a form of conference calling. The required driver is available for free distribution from Future Technology Devices International (FTDI). As a result, the radio industry is now positioned to reach a broader global audience. If your device has these, then you're ready to listen. The veteran reporter presented "Letter from America," his 15-minute radio broadcast, every week for 58 years between 1946 and 2004. Most require you to open at least a basic account to start accessing the radio stations or download the app. Check Your DeviceTo listen to an online radio broadcast, you first need to make sure your device is capable of logging on to the station and playing music. Log on to the Radio WebsiteLaunch your internet browser and type in the website address of the radio station of your choice. This field software upgrade package comprises of the following parts: Main MCU SW RF Module Software Image Read More. 216 Technisonic Communications "Sorry, I was on mute. Bring people close with your voice. 240 Traders Blvd Mississauga ON Canada L47 1W7 Jim Huddock / (612) 231-9020 Mike Hradil / (905) 890-2113 Ext. CC0/bruce mars/Pexels In an era of digital content, it didn't take long for radio stations to start streaming their broadcasts online. This SW (software) upgrade is for the TDFM-136B Radios. Motorola has recently announced its' new My View website for use by Existing Account Holders. The software is used to program the pre-set operating frequencies of the following Technisonic VHF/AM transceivers: TMS-100, TLC-100, TBS-100/200/300 and TSC-4100/4200/4300 and the TSR-4100 receiver and TST-4100/4200/4300 transmitters. This website will be your new access point in the procurement and update of your CPS software. This was one of the secrets that made people tune in to serialized radio programs week after week.For today's online meeting, create the feeling of a club by announcing who is present at the beginning of the call, welcome each member, introduce them, and add a few words about what each participant brings to the meeting. The following is information regarding Motorola's new MYVIEW Website. What did you say?"If you had a dollar for every time you've heard this in conference calls, you'd likely have retired years ago.Online meetings are excruciatingly painful, riddled with bridges that don't work, dropped calls, and people talking over one another.So how can we do it better?The answer might come from a century-old technology.The need to connect with people who can't see us was precisely the problem experienced by the early pioneers of radio. Sir Harold Evans said of Cooke, "He unflinchingly read his words into a microphone in such a beguiling manner it was as if you and he had just struck up a friendly conversation."The big secret is to treat people as if they are in the room with you; for example, talk about the weather, celebrate birthdays, or chat about real life. And then, people may listen.David Lavenda is a technology strategist for an enterprise software company in the collaboration and social business space. Beginning with Version 22.00.05 of APX-CPS, you will now need to access this new website.
